

iLEPO Qi2 Foldable Magnetic Wireless Charger iW30

Hot Selling Point

- Supports 100W high-power charging (optional) to meet the needs of high-power devices, and provides 60W and 3A standard current options, suitable for multiple scenarios of different devices.
- It integrates charging, data transmission and mobile phone charging in one, with comprehensive functions and no need for additional equipment.
- Made of braided aluminum alloy, it ensures durability and tensile resistance, and has a longer service life. Equipped with two lengths of 16cm and 100cm to meet portable and daily needs.
- LED display function (magnetic keychain model), real-time monitoring of charging status, full of technology.
- Five-core wire configuration, containing 110 tinned copper wires (wire diameter 0.1mm), excellent conductivity, while effectively reducing heat loss, ensuring charging efficiency and safety.
- Provides a variety of color options such as black, blue, gray, silver, etc., and supports customization, both beautiful and personalized.
- The packaging specifications of different lengths meet actual needs, the packaging is firm and easy to transport, and large-scale delivery is efficient and convenient.
